

## **JOB VACANCY – OUTREACH INTERN**

Publication date: 24 April, 2025

The Instituto Biofisika (IBF; [www.biofisika.org](http://www.biofisika.org)) is a joint research centre of the University of the Basque Country (UPV/EHU) and the Spanish National Research Council (CSIC). The centre focuses on fundamental and translational biophysics research and offers a highly collaborative culture.

### **Offer and description of the project**

We offer an intern position at Outreach Department at Instituto Biofisika (CSIC-UPV/EHU) (Leioa) under the project “Empleo Joven 2025 CSIC”.

The position involves designing and implementing communication and scientific dissemination strategies to increase the visibility of the Instituto Biofisika (CSIC-UPV/EHU).

Among the tasks are: to establish media relations, coordinating interviews and reports, advising researchers in their interactions with the public.

She/He will also organize events such as seminars open days and conferences, manage digital platforms for the dissemination of content and produce materials such as press releases, newsletters and reports. In addition, he/she seeks to foster the transfer of knowledge to the industry, promoting strategic collaborations. The selected will work as part of a team to ensure that the promotion actions generate a positive impact on society, the scientific community and productive sectors.

The gross salary is 26.952,94€/year.

The maximum duration of the contract will be 1 year.

### **Required background**

We seek applicants with a **good academic record and holding one of the following BA:** Fine Arts, Cultural Sciences and Cultural Dissemination, Audiovisual Communication, Communication, Marketing, Journalism, Protocol and Event Organization, Advertising and Public Relations, Public Relations.
