

WORKSHOP

PHASE SEPARATION in BIOPHYSICAL SYSTEMS

June 10th, 2024
Monday

Spitzer 2011

Atrium, Biofisika Institute – Leioa Campus

10:00

Daniele De Martino, Ikerbasque Research Associate

Thermodynamic theory of phase separation: from simple to complex

10:45

Marité Cárdenas, Ikerbasque Research Professor

Liquid-liquid phase separation in biology: from natural deep eutectic solvents to complex coacervation

11:30

Coffee break

12:00

Javier Fernandez-Martinez, Ikerbasque Research Associate

Mechanism of the nuclear pore complex selective permeability barrier

12:30

Jérôme Solon, Ikerbasque Research Professor

Chromatin Compaction

13:00

General discussion (chair: Kepa Ruiz-Mirazo)

13:30

Closing --- lunch together

Registration link: <https://tiny.cc/PhaseSeparation>
